

2020-2021 Alpine Report for Saski – Skiing for the Disabled

With Covid protocols in place there was very little activity within the province. The CADS Precourse was cancelled in Dec. as well as the Spring Festival. There were no CADS courses delivered during the season. There were several Course Conductor seminars delivered on-line. There were several outings done by the Regina club with a few individuals.

Due to the restrictions CADS finds itself in a very tight financial situation as Memberships dropped nearly 50% and several corporate sponsors also withdrew due to tighter financial situations.

Programming for this next year is being planned pending ongoing Health directives. Currently CADS members do not have to be double vaxxed but to attend or partake in any CADS programs all participants must be fully vaccinated.

For the upcoming season there has been interest expressed by Asessippi Ski Area to host a Level 1 course and/or a Sitski Module. Other ski areas will be contacted as we get closer to the ski season.
